

Cantata

C50 Amplifier 2.0

Less power, more music.

The C50 integrated amplifier is designed specifically for low-power applications, where highly-efficient speakers demand the purest electronics. This means smaller power supplies, lower heat dissipation, and simpler circuitry. Only then can an amplifier communicate the essence of a musical performance.

The C50 uses a number of techniques that prove indispensable in amplifier design: eddy-current reduction and feedback compensation optimized through listening tests. Version 2.0 also features an improved power supply with upgraded four-terminal T-network capacitors achieving even more impressive performance, more resolution and detail while maintaining musicality and flow.

We invite you to listen for yourself and decide if this isn't the best amplifier you've ever heard.

- 50 watts / channel integrated amplifier
- Discreet bipolar front end and FET output stage
- Optimized feedback control
- Eddy-currents minimized through unique output stage isolation
- (2) RCA inputs
- (2) XLR inputs
- Remote control of source and volume
- Cantata-link system control
- 43 x 23 x 5 cm (17 x 9 x 2"), 6 kg (13 lbs)
