Resolution Audio

Cantata Music Center Firmware Update

- 1. Download the latest firmware images from our website
 - MCU: <u>http://www.resolutionaudio.com/firmware/Cantata_MCU_latest.html</u>
 - FPGA: <u>http://www.resolutionaudio.com/firmware/Cantata_FPGA_latest.html</u>
- 2. Connect the Cantata Music Center to your wired ethernet network.
- 3. Open a web browser to the embedded home page:
 - For Mac/Linux, use the localhost address (replace 0123 with the last four characters of the Cantata serial number, for example 2210123
 - http://cantata-0123.local
 - For Windows, identify the IP address from your router, for example

- 4. To update the MCU, click "Choose File" next to MCU Firmware update. Navigate to the downloaded MCU firmware file. Then click Update.
- 5. The browser will show update progress. Recent versions of MCU firmware will automatically reset the Cantata when complete, while older versions will enter standby.
- 6. Once the player reboots, it will take a moment to initialize and rejoin the network. Re-open the home page, and the new version should be indicated beneath the serial number.
- 7. Updating the FPGA is the same process, using the FPGA Firmware update section.
